Important Safety Instructions

Read all warnings and instructions in this manual and in all related manuals. Save all instructions.

							
<p>To reduce the risk of serious bodily injury, including skin injection and splashing fluid in the eyes or on the skin, relieve pressure in the gun when handling the filter or any other part of the system.</p> <p>To relieve pressure, shut off the sprayer, unplug it if it is electric, trigger the gun to relieve pressure, engage the gun safety lever, and open the pressure drain valve.</p>							

1. Installation: Relieve pressure. Install the filter between the short whip-end hose and the main spray hose. See Fig. 1.
2. Cleaning:
 - Relieve pressure. Disconnect the main paint hose from the sprayer outlet. Grasp the end of the plastic retainer and pull out the filter. See Fig. 1.
 - Soak the filter in solvent and then scrub it with a fine-bristled brush. To clean the filter, disconnect it from the short hose to avoid getting contaminants into the gun. If necessary, unscrew one of the plastic retainers from the spring and slide off the filter screen. See Fig. 2.
