

238-084 Air Restrictor Kit

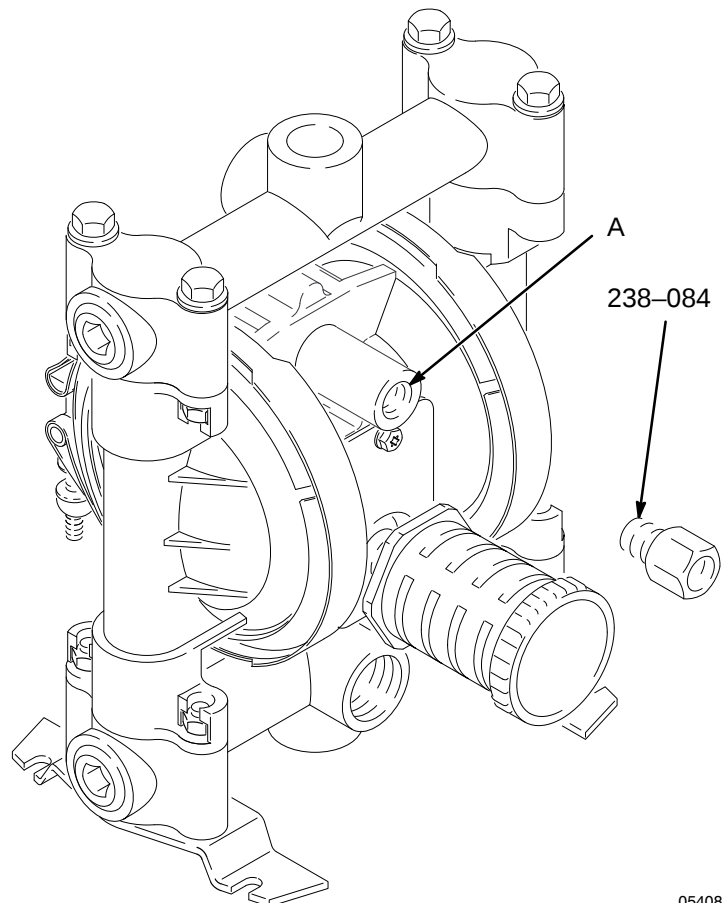

FOR USE IN HUSKY™ 715 EVACUATION SYSTEMS

100 psi (7 bar) Maximum Air Input Pressure

Install the 238-084 air restrictor into the pump air inlet (A). The internal orifice of the restrictor reduces air flow to the pump. This allows the pump to have better suction lift and reduces the air consumption by the pump.

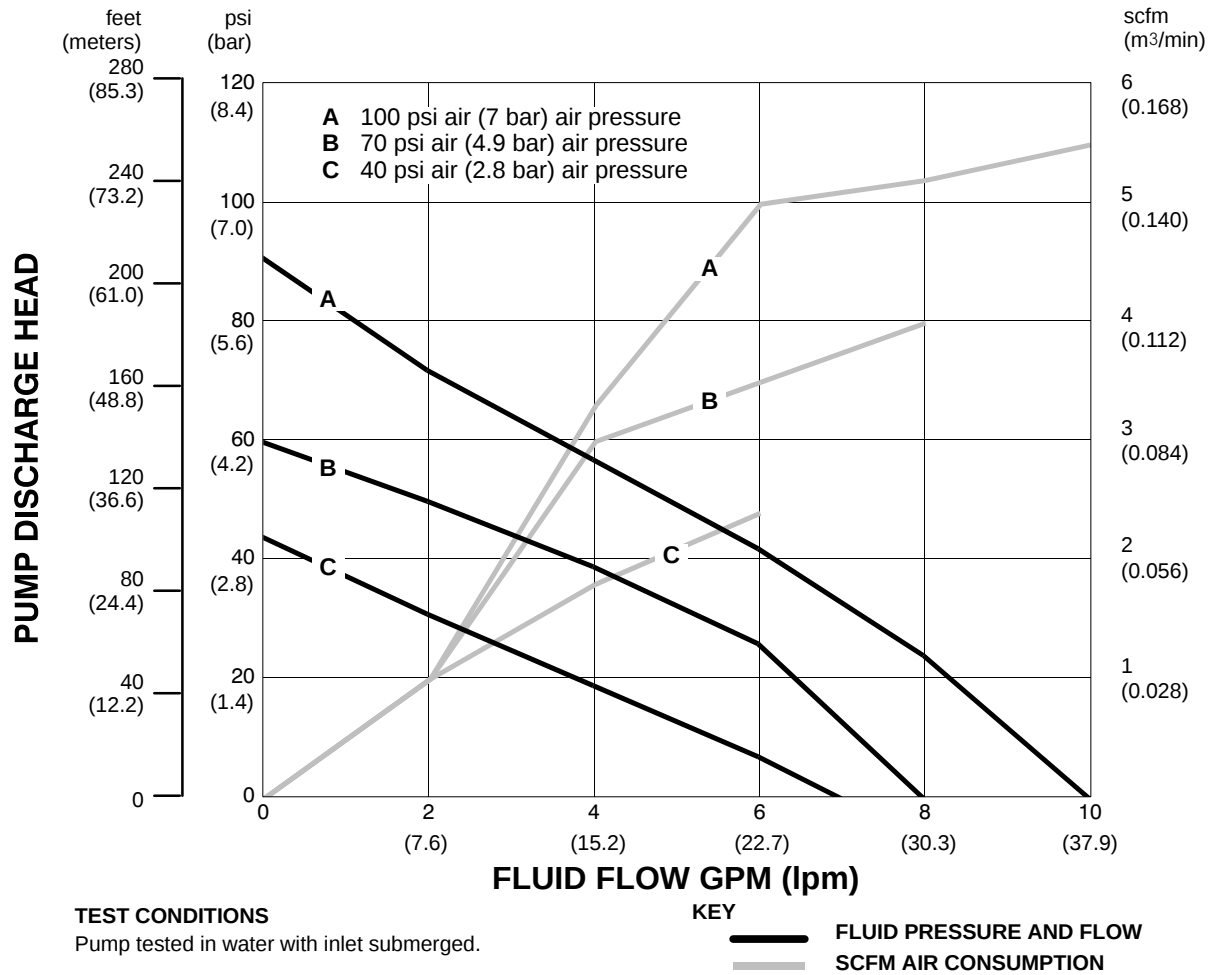

The Performance Chart on page 2 gives data for a restricted pump.

Refer to your separate pump manual for operating and service instructions.
